## PROBEAM 7R

## 7R 230W Beam Moving Head

User Manual

This manual contains important information. Please read before operating fixture.

## 1. INTRODUCTION

Thank you for selecting this product. The Moving Beam 7R is a beam moving head with OSRAM lamp. It produces stunning beam effects, ideal for stages, conernts, TV studios, live shows, night clubs, etc. To optimize the performance of this product, please read the user manual carefully before use.

### 1.1 Unpacking

The following items are included in the box:
■ $1 \times$ PROBEAM7R

- $1 \times$ Power Cord
- $2 \times$ Mounting Brackets

■ 1 x User Manual
Carefully unpack the carton, check the contents to ensure that all parts are present, and have been received in good condition. Contact your supplier immediately and retain packing material for inspection if any part is missing or damaged.

### 1.2 Safety Instructions

Warning!!! To reduce the risk of fire, electric shock, or injury to persons,
follow these important safety instructions:

- The product is for indoor use only.
- Always turn off, unplug power and allow fixture to cool before servicing.
- Ensure that fixture is properly grounded.
- Please keep this User Guide for future consultation.
- Always make sure that you are connecting to the proper voltage and that the line voltage you are connecting to is not higher than that stated on decal or rear panel of the fixture.
- Always disconnect from power before servicing or replacing fuse.
- Make sure power cord is never crimped or damaged.

Caution! Never touch the device during operation! The housing may heat up.

Caution! Never look directly into the light source, as sensitive persons may suffer an epileptic shock.

Caution! The electric connection must be carried out only by a qualified electrician.

### 1.3 Technical Data

- Power supply: AC 100-240V 50-60Hz
- Power consumption: 350W
- Lamp: OSRAM 7R 230W lamp, 8,000K, 2,000 hrs
- Beam angle: 0-4 adjustable
- 1 Colour wheel: 14 COLOURs + white
- 1 Gobo wheel: 17 fixed gobos + open
- Colour rainbow + Gobo shaking
- 8-facet rotating prism
- Motorized focus
- Frost-filter
- DMX-controlled or stand-alone with master/slave
- 2 DMX modes: 16ch [Simple]/20ch [Expand)
- Pan : 540º 16 bit ] Tilt: $270^{\circ}$ (16 bit)
- Automatic Pan/Tilt correction
- Mechanical shutter and adjustable speed strobe effect
- Touch LCD display with Joy Wheel
- Dimension: $523 \times 337 \times 511 \mathrm{~mm}$
- Weight: 19.5 kg

### 1.4 Product overview

## 2. SETUP

### 2.1 Mounting

The Moving Head is fully operational in any mounting position, hanging upside-down, side mounted, or set on a flat llevel surface, etc.

IMPORTANT!!! Safety cables must always be used when unit is celling or truss mounted. The safety cable must be capable of holding 10 times the weight of the fixture. The equipment must be installed by professionals.

DANGER OF FIRE!
When installing the device, make sure there is no highly-inflammable material [decoration articles, etc.] within a distance of min. 0.5 m .

### 2.3 AC Power

The fixture is designed to work on AC $100-240 \mathrm{~V} 50-60 \mathrm{~Hz}$. All units must be powered directly from a switched circuit. This unit cannot be run on a rheostat or dimmer circuit even if used solely for a $0 \%$ to $100 \%$ switching.

## WARNING!!! All fixtures must be connected to circuits with a suitable Earth Ground.

The occupation of connection-wire is as follows:

| Wire | Pin | International |
| :--- | :--- | :--- |
| Brown | Live | L |
| Blue | Neutral | N |
| Yellow/Green | Earth | $\doteq$ |

### 2.4 DMX Linking

You can link the Moving Head 7R to a DMX controller using a 3- or 5-pin DMX cable.

It is recommended to use a $D M X$ terminator for installations where the $D M X$ cable has to run a long distance, or is in an electrically noisy environment. The DMX terminator is simply an XLR plug with a $120 \Omega$ resistor connected between pins 2 and 3 ,which is then plugged into the output XLR socket of the last fixture in the chain. Please see illustrations below.

| 19 | FOCUS SPEED | $0-255$ | Focus speed from fast to slow |
| 20 | 20 | $0-049$ | DMX mode |
|  |  | $050-099$ | Pan Auto |
|  |  | $100-149$ | Tilt Auto |
|  |  | $150-199$ | Auto mode |
|  |  | $200-255$ | Sound mode |

## 4. General Maintenance

### 4.1 Fuse Replacement

a. Unscrew the fuse holder and remove the damaged fuse.
b. Replace with the same type fuse (F7A/250V) and screw fuse holder back in its place.

### 4.2 Cleaning

Dust build up reduces light output performance and can cause overheating. This can lead to reduction of the light source's life. We recommend frequent cleaning of the fixture. When cleaning, please use a moist, lint-free cloth. Never use alcohol or solvents.

### 4.3 Lamp replacement

The moving head is equipped with an Osram 230W lam. Follow the procedure below to safely change the lamp.

Figure 1

Figure 2

Figure 3

Figure 4

1) Turn off the product and disconnect it from power. Wait at least 15 minutes for lamp to cool down.
2) Use 1 / 4 turn screw driver to remove 2 head covers. See Figure 1.
3) Remove the fan that blows out (not the other one) by 2 screws to access the lamp. See Figure 2-3.
4] Push the lamp reflector downward meanwhile grasp the lamp base to pull it out.
4) Remove the 2 wires connected to the lamp by the spade connectors.
5) Reverse the steps above to install the new lamp.

Warning! DO NOT touch the lamp without wearing gloves to avoid leaving grease on the bulb or on the contacts that could reduce the lamp's life.

## IMPORTANT INFORMATION!

In order to optimize the recovery and recycling of the materials that old appliances contain and reduce the impact on human health and the environment, ensure that this product is recycled at the end of its life.
